

VISIONSCONNECTED

Web Client

Mobile Video Communication (Up to approx. 1 person)

The VisionsConnected Web Client is a full service soft phone, based on the latest web technology.

In the past you had to install software to be able to make video calls on your computer or laptop. Not anymore.

Because the client is essentially a website, it does not need extra software to be installed and can be accessed anywhere at any time. The Web Client delivers a high quality video solution that can be customized to your personal needs.

BE MOBILE, BE FLEXIBLE, BE IN TOUCH

- **Experience the use of video communication everywhere** - Whenever you are at home, in the office, at the airport or on a holiday. With the VisionsConnected Web Client you can always enjoy the advantages of video communication, even when you do not have your own computer with you.
- **Ease of use** - The web client does not require an application installed on your personal computer. It works via a secured internet page. Smart bandwidth profiles let you use the Web Client on every type of internet connection. And you can activate the client on multiple devices.
- **Customized Configuration** - Not every Web Client will be used the same way. That's why we've designed it to allow you to add additional features or customize the look and feel. To create an experience tailored to your needs.

Get the most from your investment with VisionsConnected professional services. VisionsConnected experts support deployment of complex video infrastructures, installation, configuration and usage & adoption. Visit www.visionsconnected.com for more information.
